Abstract Newspaper Art from "<https://www.publicdomainpictures.net/en/view-image.php?image=139202&picture=abstract-newspaper-background>"

Home.html
uses collapsed
columns, news
links that open
in new tab, and
glyphicons for
the purple
buttons.

Local_News.html uses well for the article. The default well colour and default well text colour is changed from grey to red & yellow. In addition, a home button is created using glyphicon, which redirects back to Home.html [in new tab]

Cabinet approves 55 MW wind power project

Chinese-Bangladeshi consortium to set up the plant at Mongla

The Cabinet Committee on Public Purchase today approved the proposal of a Chinese-Bangladeshi consortium to set up a 55 MW wind power plant on build-own-operate basis at Mongla in Bagerhat.

As per the proposal, the Consortium of Envision Energy, (Jiangsu) Co Ltd, China, SQ Trading and Engineering, Bangladesh and Envision Renewable Energy Limited, Hong Kong will set up the plant under a 20- year contract with Bangladesh Power Development Board (BPDB).

State-owned BPDB will purchase electricity from the plant at a tariff of US \$ 13.20 cents, equivalent to Tk 10.56 per kilowatt hour (each unit) over the period of 20 years.

The government will pay a total of Tk 2036.12 crore for the entire contract period against its purchase of electricity from the maiden private wind power project, said Saleh Ahmed, additional secretary of the Cabinet Division, while briefing reporters on the cabinet body meeting.

The Chinese-Bangladeshi consortium was the lone bidder to participate in the tender process invited for the project, said a BPDB official.

Bangladesh now a development model

Says Turkish ambassador

Turkish Ambassador Mustafa Osman Turan has said his country wants to make an increased investment in Bangladesh and raise the bilateral trade volume through product diversification.

Bangladesh has a very bright future and its economy is growing fast like Turkey, he said.

"Turkish investors are keen to invest in Bangladesh as it offers attractive incentives for foreign investors," he told news agency UNB in an interview at his office.

The envoy who came to Bangladesh just before the Covid-19 outbreak said a prominent Turkish company will invest \$100 million in the liquefied petroleum gas sector in Chattogram. "That will be an initial investment."

Turan said improving bilateral trade, boosting investment in Bangladesh and enhancing cultural and people-to-people ties will be among his priorities during his tenure in Bangladesh.

Climate change devastated dinosaurs not once, but twice

Most people know that land-dwelling dinosaurs were wiped out some 66 million years ago when an asteroid roughly twice the diameter of Paris crashed into Earth. If the explosive fireball didn't get them, the plunge in global temperature on a planet with little or no ice — caused by a blanket of heat-shielding debris in the atmosphere — did.

What most people don't know is that more than 100 million years earlier, another climate change cataclysm devastated a different set of dinosaur species, with many going extinct. Except for this time, it was global warming rather than global cooling that did them in, with the planet heating up more quickly than the dinos' capacity to adapt.

Scientists have found evidence of this traumatic event some 179 million years ago in plant fossils in Argentine Patagonia. They also discovered a previously unknown dinosaur. The species, called *Bagualia alba*, is in the family of massive, long-necked sauropods, the largest animals to walk the Earth. Before the global warming event, sauropods were only one branch of the Sauropodomorpha lineage.

23     /* #ABD6DC #E6F2F4 #F3C4DF */
24     background: #F7D0E6!important;
25 }
26
27 #nttLogo{
28     height: 100px;
29     width: 100px;
30 }
31
32 #websiteTitle{
33     font-size: 10em;
34     vertical-align: middle;
35     font-family: "Pacifico", cursive;
36 }
37
38 #websiteSlogan{
39     font-size: 5.4em;
40 }
41
42 .jumbotron{
43     padding-top: 30px;
44     padding-bottom: 30px;
45     margin-bottom: 30px;
46     color: inherit;
47     background-color: #d5c4cf;
48 }
49
50 .btn-primary{
51     border-color: #3B0B2E;
52     background-color: #6A0888;
53     color: #FFFF00;
54 }
55
```

All html files used these code lines to format the website name (inside jumbotron) and Button colours (purple button with yellow text And yellow glyphs).

```
/* change well text colour and background colour */
.well{
    color: white;
    background-color: #C48793; // #8f246b; // #004080;    // #00264d;
}

blockquote{
    color: black;
    //color: #004080
}
```

Home.html uses these well and blockquote formatting. The well background is purple and blockquote text is black.

```
/* change well text colour and background colour */
.well{
    color: #EDB4A7;
    background-color: #900C3F;
}

/* change link colours to yellow */
a{
    color: #FFFF00;
}
```

The rest of the files use these code lines, where the well is red and the links are yellow coloured.
